

## PROJECT SCOPE

The Village of Mount Prospect & River Trails Park District will soon begin construction of a storm sewer and detention pond project in the Burning Bush Trails Park and along Lama Lane. The Contractor, DiMeo Brothers Construction, is scheduled to mobilize and start preliminary work beginning Thursday, November 14<sup>th</sup>, weather depending. You will notice traffic control barricades and signage being set up during this week. Construction is anticipated to begin the week of November 18<sup>th</sup>.

The project consists of installing large 54" diameter storm sewer pipes starting at the intersection of Tano Lane & Lama Lane. Installation of the storm sewer will continue south on Lama Lane and will connect into the Burning Bush Trails Park. The park fields will be excavated to provide a large detention basin. The basin will be utilized for storm water detention during heavy rain events and will include the complete reconstruction of two baseball fields with short retaining walls for seating, new dugouts, staircases and handicap-accessible ramps. An underdrain system and irrigation system will also be installed throughout the basin.

Construction of the detention basin and installation of the large storm sewer pipes will help reduce the risk of recurring surface flooding endured by homeowners in the area.

## CONSTRUCTION SCHEDULE

**November 18<sup>th</sup> – December 2019:** Storm sewer installation and roadway work long Lama Lane from Tano Lane to the Burning Bush Trails Park.

**December 2019 – March 2020:** Excavation of the detention basin in Burning Bush Trails Park.

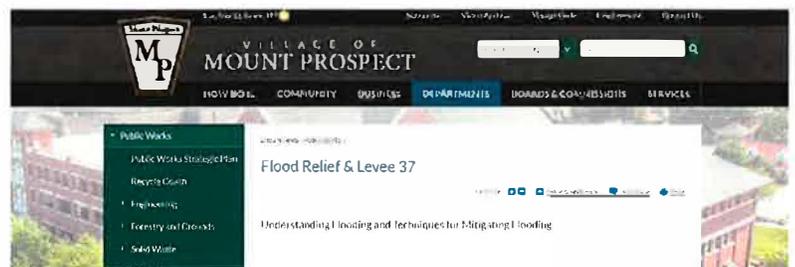

**April 2020 – June 2020:** Installation of retaining walls, stairs, irrigation system and baseball field amenities.

**June 2020 – July 2020:** Landscape restoration of the park.

As the sewer is installed along Lama Lane, there will be daily street closures with a signed detour route. All neighborhood streets will be open at the end of each working day. There will be no interruption to services such as mail delivery, garbage pick-up, leaf pick-up, snow plowing, and emergency response. The Village will work to minimize the inconveniences created by the project and appreciates your patience during construction.

## STAY CONNECTED

A project web page on the Village web site has been created to provide you information on the improvements. It will continually be updated throughout the project to keep you informed of the progress. The link to the project web page is: [www.mountprospect.org/burningbushtrails](http://www.mountprospect.org/burningbushtrails)
