

PROJECT UPDATE

The contractor has completed fabrication and installation of the junction chamber in the Tano Lane & Lama Lane intersection and the intersection is now reopened to traffic. The junction chamber connects the existing storm sewer pipe along Tano Lane with the new storm sewer pipe along Lama Lane. The contractor has also installed approximately 400' of 54" diameter storm sewer pipe from the junction chamber south across Burr Oak Drive. The remaining storm sewer pipe from Burr Oak Drive to the park will be installed in January and February.

Work in Burning Bush Trails Park started this week. Large scrapers are in the process of removing the topsoil and stockpiling it in a corner of the park. At the end of the project, after the underground drains are installed, the topsoil will be regraded over the area and used to reestablish grass.

Illinois American Water Company relocated an 8" diameter water main as well as several water and sanitary sewer services that would have been in conflict with the new 54" diameter storm sewer pipe. This will allow the contractor to complete installation of the pipe along Lama Lane without interruption.

The contractor is planning to suspend work next Monday, December 23rd and return Monday, January 6th. The streets and parkways will be cleaned and safeguarded before the contractor leaves the jobsite for this two-week period.

Thank you for your continued patience during this important project. The Village wishes you a safe and happy holiday season.

existing storm sewer pipe on Tano Lane – 12.03.2019

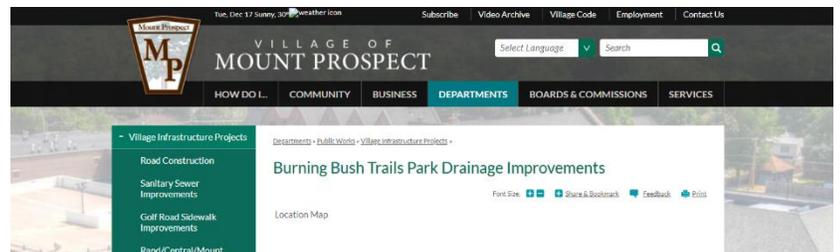

new junction chamber that connects pipe on Tano Lane with new pipe on Lama Lane (shown without top cover) – 12.16.2019

new 54" diameter storm sewer pipe installed along Lama Lane – 12.18.2019

STAY CONNECTED

A project web page on the Village web site has been created to provide you information on the improvements. It will continually be updated throughout the project to keep you informed of the progress. The link to the project web page is: www.mountprospect.org/burningbushtrails
