## Village of Mount Prospect

50 South Emerson Street, Mount Prospect, Illinois 60056

July 20, 2010

The Honorable Irvana K. Wilks, Village President,  
Board of Trustees, Finance Commission Members,  
and Residents of the Village of Mount Prospect

I am very pleased to forward to you a copy of the 2011-2015 Capital Improvements Plan (CIP) of the Village of Mount Prospect. This is the Village's fourteenth CIP. The CIP gives us a clear, comprehensive view of our long-term capital needs and a firm basis from which to begin the preparation of the next year's operating budget. The total cost for all projects in the 2011-2015 CIP is \$54,132,847.

### *The Concept of a CIP*

The CIP is our plan for capital expenditures/projects over the upcoming five years. We have defined capital expenditures/projects, in general, as the purchase or construction of long-lived, high-cost, tangible assets. For our purposes, "long-lived" implies a useful life in excess of one year. "High-cost" means that the project amounts to at least \$25,000. "Tangible" assets exclude contractual services except those that are necessary for putting a tangible asset into service.

The guidelines for capital expenditures/projects have been relaxed in certain instances so as to include certain items in the CIP that otherwise would not meet our basic definition of a capital item. For the first instance, departments were asked to state any need for an addition to the Village's vehicle fleet as a CIP project request even if the cost of the vehicle concerned would be less than \$25,000. We have used this convention because the purchase of a vehicle represents a substantial commitment on the part of the Village. Once a vehicle is recognized as an operational need, lease payments to the Vehicle Replacement Fund (internal service fund charges) become necessary in the budget programs of the operating departments so as to provide for the replacement of the vehicle. In other words, we start programming the financial means to replace a vehicle in the year following its purchase. Given the continuing financial implications of adding a vehicle to the Village fleet, proposals for additions to the fleet should be closely scrutinized.

The second instance of relaxation of the capital project guidelines relates to certain high-cost projects that do not necessarily give rise to a tangible asset but are related to maintaining capital assets. This has been done simply to document the other large capital-related expenses that confront us. The best example of such a project included in this CIP is Sewer Main Rehabilitation (page F-5).

In addition, Information Technology (IT) related projects are now part of the CIP. Many of these projects have costs that fall below the \$25,000 threshold, but are being included to coordinate IT purchases among the different departments. This will also ensure that additions to the computer system are picked up in computer replacement program, similar to the way replacement vehicle purchases are made using the vehicle replacement fund.

A project's inclusion in the CIP does not, in and of itself, commit the Village to funding and accomplishing it. As stated above, the CIP identifies our capital needs. Available funds, taxing capacity, and debt capacity may require that some projects ultimately be deferred beyond the years in which they are initially programmed for accomplishment in the CIP. Even so, the CIP will have served its purpose as a planning tool. However, projects programmed for the first year of the CIP (the year 2011 in the case of this 2011-2015 document) take on special importance because they must be addressed in the next year's Village operating budget. To help understand the impact the expenditure/project would have on the Village's finances, detailed five-year financial forecasts for all major operating and capital funds have been included in this document and can be found in Section H (Five-Year Financial Forecast).

### *The Review Process*

The process that we have put in place to yield the CIP closely parallels what has been the Village's traditional budget process. For the 2011-2015 CIP, the operating departments submitted their project requests to the Finance Department. The Finance Department compiled the project requests. A staff review team consisting of the Village Manager, Assistant Village Manager, Finance Director, Deputy Finance Director and Administrative Analyst then meet with each of the departments to discuss the requests. The proposed CIP is then distributed to the Village Board and Finance Commission for consideration (without a commitment to funding all included projects).

### *The Project Requests*

You will note that most of the project requests included in the 2010-2014 CIP reappear in the 2011-2015 document. In some cases, a project scheduled for a particular year has been accelerated or deferred based upon the staff's reassessment of Village needs. In other cases, the cost of a project may have changed due to our obtaining more complete information about it. Refinements such as these are an appropriate part of the capital projects planning process. The CIP is a working document. Our intent is to update it annually to reflect the current needs of the Village and the best information available.

There are a few aspects of the 2011-2015 CIP that I would like to highlight.

- *Street Improvement Program (page F-2)*. This submittal is part of the continuation of the street revitalization program approved by the Board in early 1997. The amount allocated for resurfacing has decreased from the original program spending plan. The street program is funded with a combination of MFT and Street Improvement funds. Revenue shortfalls in 2001 - 2004 and again in 2009-2010 have forced the Street Improvement Fund to reduce its contribution from the original plan amount. As a result, the expected completion date of the original program has been pushed back from 2006 to 2011. The 2011-2015 CIP is showing a total of \$17.8 million being spent on resurfacing over the five-year period.

- *Combined Sewer Improvements (page F-3).* A study of the combined sewer service area revealed significant structural deterioration of main line pipes and manholes. A combined sewer evaluation study was completed in 2004 and the results of this study were used to identify potential problems and prioritize repairs. Category 5 (immediate attention needed) defects were first addressed in 2006 and were completed in 2007. Category 4 (severe, although not as immediate) defects are expected to be addressed during 2007 - 2010. Category 3 (less immediate) defects are to be corrected during 2009 - 2013. The total amount of the project was initially estimated to be \$15,000,000. Pricing during the early, most critical phases has been favorable and the total cost for the program will likely come in below original estimates. Funding for the project comes from an increase in the sewer rate and a \$5.00 per month sewer construction fee.

- *Flood Control Program (page F-4).* Over the next five years, there are two large-scale flood control improvement project anticipated. The Prospect Meadows storm sewer and ditch improvements project is scheduled to begin in 2011 and is a three-year project. Total cost to complete the work in Prospect Meadows is estimated at \$1.0 million. The Hatlen Heights storm sewer project is scheduled to begin in 2015 and is estimated to cost \$1.9 million. Due to limited resources, these other large-scale projects have been deferred until funds become available. The dedicated funding source is a ¼ percent home rule sales tax that is currently used to support debt service issued for flood control related projects. A portion of the revenue becomes available during 2010 when several of the issues are expected to be paid off. See page F-4 for more detail on these pending projects.

- *Ash Tree Removals and Replacement (pages F-14 and F-15).* The Emerald Ash Borer is an exotic beetle that was discovered in southeastern Michigan near Detroit in the summer of 2002. The adult beetle nibbles on ash foliage but cause little damage. The larvae (the immature stage) feed on the inner bark of ash trees, disrupting the tree's ability to transport water and nutrients. This destructive pest was first found in Illinois in June 2006, in Kane County. Since then it has been found in several communities throughout the Chicagoland area. In response to these announcements, the Village of Mount Prospect is attempting to minimize the impact on its tree population by establishing a systematic tree removal and replacement program for its Ash population. This ten-year program will remove and replace all Ash trees on public property. Current pricing for tree removal is \$348 and for tree replacement is \$209. Total estimated cost for the ten-year program (with inflation) is approximately \$1.8 million. The Village Board approved a program in 2009 to begin treating Ash trees to try and prevent infestation of approximately 800 existing White, Blue and Manchurian Ash trees. These trees will not require removal/replacement.

### *Sources of Funds*

The 2011-2015 CIP includes a summary of "Projects by Sources of Funds" (pages A-10 through A-12). This summary provides an overview of the potential demands upon the Village's financial resources. A few comments are warranted with regard to the "Projects by Sources of Funds" summary. To further assist the reader in understanding the affordability of the projects, five-year financial forecasts are included in this document in Section H.

The Village has in place a home rule sales tax to support certain capital programs and operations. Three-quarters of the 1% home rule tax is allocated to capital projects. The Street Improvement, Flood Control, and Capital Improvement Funds each receive annually a ¼% share (approximately \$1.2 million). As mentioned previously, projects are placed in the 5-year capital plan based on available revenues. When home rule tax receipts fall short of projections, adjustments are made to existing budgets in these Funds and future projects are deferred until revenue becomes available.

- *General Fund.* The General Fund is the Village's primary operating fund. The only capital projects charged to the General Fund are those to be undertaken each and every year, although the level of funding from one year to the next may vary. Projects charged directly to the General Fund include IT projects (G-3 – G-4, G-6 – G-8, G-10 and G-16 – G-17), sidewalk improvements (F-6 and F-9), tree planting (F-11), Turnout Gear (D-2), Storm

Sewer Inspection Program (F-31) and Aerial Photogrammetry (F-33). There is typically \$200,000 to \$400,000 worth of projects charged to the General Fund each year. The General Fund five-year forecast (H-2) is showing a preliminary deficit of \$2.7 million for 2011. Significant discussion has already taken place to address the budget deficit.

- *Capital Improvement Fund.* The Capital Improvement Fund is the Village's fund for "Intermediate sized" capital expenditures that are either nonrecurring or expected to end at a determinable point in the future. It is not a fund through which bond proceeds are expended. Large capital purchases would generally be made through a bond proceeds fund. Prior to 2001, the Village was able to transfer excess General Fund revenues to the Capital Improvement Fund. However, stalled revenues resulted in our having to discontinue the transfer beginning with the 2002 fiscal year. From 2002 through 2007 approximately \$3.7 million in projects were deferred due to discontinuing the General Fund transfer.

In 2007, the Village Board approved a permanent funding source for these mid-sized capital projects. An additional ¼ percent home rule sales tax was implemented beginning January 2008 that will generate approximately \$1.2 million annually. It is intended to allocate a portion of the revenue towards building up the fund balance for both the Capital Improvement Fund and the Village's two Parking Funds. Approximately \$1.0 million is available for capital projects. Fund balance at the end of 2009 in the Capital Improvement Fund was \$1.3 million, but is expected to be drawn down during 2010 due to carry-over projects. Fund balance policy states the fund balance shall be maintained at 50% of the five-year average for capital expenditures supported by this fund to a maximum of \$1 million. Further prioritizing of projects is needed in 2012 and beyond to ensure the goal of fund balance stabilization is met.

- *Motor Fuel Tax Fund and Street Improvement Construction Fund.* The street maintenance and resurfacing programs are supported primarily from these two funds. Revenue to support the programs comes primarily from the state and local motor fuel tax and ¼ percent home rule sales tax. As mentioned earlier in this transmittal, both of these revenue sources are expected to decline (home rule sales tax) or remain flat (state motor fuel tax) over the next couple years resulting in fewer funds available for the program. Adjustments to the amount of work planned in 2009 - 2011 were made due to declining revenues.

- *Water and Sewer Fund.* There are numerous projects listed in the CIP as being funded out of the Water and Sewer Fund since they directly relate to our providing water and sanitary sewer service to customers. The 2011-2015 CIP is showing projects valued at an average of \$3.4 million per year over the next five years. The Water and Sewer Fund had a cash and investment balance of \$5.7 million at the end of 2009. Our five-year financial forecast for this fund is shown on pages H-13 thru H-16. The current rate structure is sufficient to support ongoing operations as well as the capital projects proposed in the five-year plan.

A great deal of staff time and effort has been invested in the development of the 2011-2015 CIP. Certainly, the investment has been a prudent one. The CIP gives us a clear picture of the Village's capital needs for the next several years. Meetings with the Village Board and Finance Commission to discuss the Proposed CIP will provide further direction leading in the budget process for 2011.

Respectfully submitted,

Michael E. Janonis  
Village Manager

## 2011 – 2015 CAPITAL IMPROVEMENTS PLAN

### *Structure of the Document and the Project Request Form*

Conceptually, there are two ways of organizing the various project requests: by requesting department or by project type. Organization by department is most useful to the Village for management purposes. Therefore, after the summaries section of the CIP, project requests are organized by department and set off in separate sections.

The summaries section begins with a recapitulation of project requests by department on page A-1. However, immediately following this recapitulation, beginning on page A-2, are several summaries by project type group. These summaries provide the alternate view of the project requests. The project type groups are: Water and Sanitary Sewer, Flood Control and related projects, Street Construction/Reconstruction and Resurfacing, Public Buildings, Computer Hardware and Software, Equipment, and Miscellaneous.

In the final pages of the summaries section, pages A-10 through A-12, the project requests are listed by their sources of funds.

Each departmental section begins with a summary of the project requests. Most of the blocks on the project request form are self-explanatory. However, some elaboration about certain blocks may be helpful.

- *Project Name.* In this block, each project is given a short title followed by an “(E)” if it is the continuation of an established project or an “(N)” if it is a new project. Until funds are provided for a project for at least one year in the Village operating budget, the project is considered to be new.
- *Project Type Code.* As stated above, each project or portion of a project has been assigned to a project type group. Each group has a specific project type code. These codes are detailed on page vii. Projects or portions thereof with the same project type code are presented in separate summaries on pages A-3 through A-9.
- *Description.* This block provides a more detailed description of the project than is possible in the “Project Name” block.
- *2011 Dept. Priority.* Because projects for which amounts have been requested for 2011 must be considered for funding during the formulation of the 2011 Village Budget, they take on special importance. To facilitate the evaluation of these projects, the departments have prioritized them with “1” being the highest priority, “2” the next highest, and so on. The priorities have been assigned without regard to source of funds. This has been done to provide an overall picture of the relative importance of each project from the department’s perspective.
- *Annual Dollar Impact Upon the Operating Budget.* Operating expenditures may come with the purchase or construction of a capital asset. For example, annual maintenance agreements are necessary with many items of equipment. In some circumstances, the purchase of a capital asset may enable the Village to reduce operating expenditures. Information provided in this block addresses those effects.
- *Source of Funds.* A potential source of funds has been indicated for most projects. For some projects, multiple potential sources are shown.

## 2011– 2015 CAPITAL IMPROVEMENT PLAN

### *Project Type Codes*

1. Water and Sanitary Sewer:
  - 10 – Water System
  - 20 – Sanitary System
2. Flood Control and Related Projects:
  - 30 – Flood Control Projects
  - 40 – Storm Sewer
3. Street and Related Projects:
  - 50 – Street Construction and Reconstruction
  - 60 – Resurfacing/Curbs & Gutters/Sidewalks
4. Public Buildings:
  - 70 – Construction of and Improvements to Public Buildings
5. Equipment:
  - 80 – Computer Hardware/Software
  - 85 – Vehicles and Automotive Equipment
  - 90 – Non-Automotive Equipment (excluding computer hardware/software)
6. Miscellaneous:
  - 00 – Miscellaneous

## 2011 – 2015 CAPITAL IMPROVEMENTS PLAN

### *Equipment Replacement Guidelines*

Pickups/Vans	10 years
Squad Cars	3 years
Pool Cars	5 years
Other Cars	8 years or 50,000 miles
Aerials	15 years
Trailers	15 years
Small Dumps	12 years
Special Purpose Trucks	10 years
Sweepers	12 years
Large Dumps	15 years
Tractors	15 years
Leaf Machines	15 years
Other Equipment (depending upon usage)	6-20 years
Computer Hardware/Software	3-5 years

## 2011 – 2015 CAPITAL IMPROVEMENTS PLAN (CIP)

### *Planning Calendar*

CIP worksheets and instructions forwarded to department directors	3/5/10
Completed <i>Computer</i> CIP worksheets returned to Finance Department	3/19/10
Remaining CIP worksheets returned to the Finance Department	4/2/10
Departmental meetings with Village Manager and Finance Director	5/10/10 - 5/14/10
Complete Proposed CIP Amounts	5/21/10
Proposed CIP distributed to Village Board and Finance Commission	6/11/10
Proposed CIP reviewed by the Finance Commission	6/24/10
Proposed CIP reviewed by the Board at a Committee of the Whole	7/13/10
Acceptance of Proposed CIP by the Village Board	7/20/10
CIP distributed	8/6/10

2011-2015**

<b>Project Name:</b>	Corridor Improvements (E)	<b>Project Type Code:</b>	50
<b>Department:</b>	Community Development	<b>2011 Dept. Priority:</b>	2

**Description:** Parkway improvements, including trees, sod, sidewalks, banners, etc., along the major commercial corridors in the Village as discussed in the corridor plans.

**Location:** Village wide

**Justification/Comments:** The Corridor Improvement Plan was adopted by the Village Board in FY 2000 in an effort to improve the visual appearance of our commercial corridors. These improvements will greatly enhance the commercial viability of these corridors by creating attractive areas that will encourage people to shop in Mount Prospect. In addition to the improvements in the public right of way, these funds would support a facade upgrade program for commercial properties outside of the TIF area. This program would provide matching grants for business/property owners to upgrade their buildings and grounds further enhancing the Village's commercial corridors. Improvements to properties in low-mod census tracts would occur in the public ROW.

**Annual Dollar Impact Upon the Operating Budget:** Negligible.

2011-2015**

<i>Project Name:</i>	Turnout Gear (E)	<i>Project Type Code:</i>	90
<i>Department:</i>	Fire	<i>2011 Dept. Priority:</i>	1

*Description:* Replace 10-15 sets of turnout gear annually.

*Location:* Fire Department

*Justification/Comments:* Historically the Fire Department has purchased between 10-15 sets of bunker gear on an annual basis. The gear consists of a bunker coat, bunker pants, suspenders, hoods, helmets, and gloves. Per NFPA turnout gear should be replaced every 5 years. Based on inspections of the gear we are able to extend the replacement to 6 years and sometimes longer based on the condition of the gear.

*Annual Dollar Impact Upon the Operating Budget:* \$500 for miscellaneous repairs.

<i>Project Costs:</i>	2011	2012	2013	2014	2015	Totals

<i>Project Name:</i>	Furniture Replacement (N)	<i>Project Type Code:</i>	90
<i>Department:</i>	Fire Department	<i>2011 Dept. Priority:</i>	N/A

*Description:* Replace office furniture in Fire Administration, Fire Station 13 Offices, and Training Room.

*Location:* Fire Department Station 13

*Justification/Comments:* The furniture in Station 13 is the original furniture purchased in 1994 when the public safety building was built. The furniture is in need of replacement. The plan is to replace the furniture near the fire prevention secretary, the waiting area outside the fire chief's office, the conference room chairs, and the furniture in the fire chief's office.

*Annual Dollar Impact Upon the Operating Budget:* None

<i>Project Name:</i>	Locker-Room Restrooms Renovations	<i>Project Type Code:</i>	70
<i>Department:</i>	Police Department	<i>2011 Dept. Priority:</i>	1

*Description:* Remove and replace all sinks, counters, faucets, toilets, showers and stalls, and all wall and floor tiles in the men's and women's locker rooms

*Location:* Police Public Safety Building

*Justification/Comments:* The public safety building was opened in 1993. Both the men's and woman's locker rooms include restrooms with typical plumbing fixtures, shower stalls, and tiled floors and walls. Because of their extensive use by all three patrol shifts seven days a week, the tile surfaces, fixtures, counters and shower stalls have become extremely worn and unsightly. It is not uncommon for water to pool outside shower stalls creating a safety hazard. The countertops are cracked and peeling in several areas and several of the metal surfaces are rusted.

It is staff's recommendation to replace all fixtures, counters and tiling so as to improve the hygiene, safety and suitability of the facilities for use by police personnel. Additionally, we will endeavor to use water saving plumbing fixtures and low flow shower heads to reduce energy costs.

**VILLAGE OF MOUNT PROSPECT  
CAPITAL IMPROVEMENTS PLAN  
2011-2015**

<b>Project Name:</b>	Street Improvement Program (E)	<b>Project Type Code:</b>	60			
<b>Department:</b>	Public Works	<b>2011 Dept. Priority:</b>	1			
<b>Description:</b>	Resurfacing of Village streets to maintain 20-year life.					
<b>Location:</b>	Various					
<b>Justification/Comments:</b>	<p>Repair of Village streets to provide safe and smooth pavement for motorists and to prevent necessity of complete street reconstruction. Materials testing will be conducted as part of this project to verify compliance with project designs and Village codes. Due to a shortage in the street improvement fund in 2010, and projected 2011 shortfall, the amount of miles resurfaced were reduced from 6.8 miles to 5 miles in 2010 and 4 miles in 2011. 2012 will be the first year of the new annual funding level necessary to maintain 6.8 miles annually for an average 20-year life for all Village streets. Note: 20 year life funding level formula: 6.8 miles x 5,280 feet/mile x \$100/foot (2011 cost) = \$3,580,000 (3% annual increase)</p>					
<b>Annual Dollar Impact Upon the Operating Budget:</b>	Annual crack sealing cost is \$52,000 (2010)					
<b>Project Costs:</b>	<u>2011</u>	<u>2012</u>	<u>2013</u>	<u>2014</u>	<u>2015</u>	<u>Totals</u>

CAPITAL IMPROVEMENTS PLAN  
2011-2015**

<i>Project Name:</i>	Combined Sewer Improvements (E)	<i>Project Type Code:</i>	40
<i>Department:</i>	Public Works	<i>2011 Dept. Priority:</i>	2

*Description:* Evaluate and repair main line sewers and appurtenances in combined sewer service areas.

*Location:* Various

*Justification/Comments:* Recent inspections of combined sewer service areas have revealed significant structural deterioration of main line pipes and manholes.

A combined sewer evaluation study was completed in 2005 and the results of this study were used to identify potential problems and prioritize repairs. Repairs were initiated in 2006.

Category 5 defects completed in 2007.  
 Category 4 defects completed in 2010.  
 Category 3 defects to be corrected between 2009 - 2013.  
 Category 2 defects to be corrected between 2014 - 2018.

*Annual Dollar Impact Upon the Operating Budget:* None

<i>Project Costs:</i>	<u>2011</u>	<u>2012</u>	<u>2013</u>	<u>2014</u>	<u>2015</u>	<u>Totals</u>
Design and Construction	1,000,000	1,000,000	1,000,000	1,000,000	1,000,000	5,000,000

**VILLAGE OF MOUNT PROSPECT  
CAPITAL IMPROVEMENTS PLAN  
2011-2015**

<i>Project Name:</i>	Flood Control Program (E)	<i>Project Type Code:</i>	30
<i>Department:</i>	Public Works	<i>2011 Dept. Priority:</i>	3

*Description:* Sewer improvement projects designed to minimize area-wide flooding problems that were identified in the 1990 Flood Study.

*Location:* Various

*Justification/Comments:*

High incidence of sewer surcharging, basement back-ups and area-wide flooding associated with high frequency rain events in following areas:

- 1) Village Creeks: Remove/trim trees on creek banks, remove debris (2011-15).
- 2) Prospect Meadows Storm Sewer & Ditch Improvements (2011-2013).
- 3) McDonald Creek Bank Stabilization (\$1,500,000 - 2016).
- 4) Hatlen Heights Storm Sewer (\$1,900,000 - 2015).
- 5) Feehanville and Higgins creeks stabilization scheduled for outlying years (Pending - \$3,700,000).

NOTE: Stabilization Maint. = Repair/Replace a-jacks, monoslabs, rip-rap, permanent erosion control blankets, etc., used to stabilize banks.

*Annual Dollar Impact Upon the Operating Budget:* None

<i>Project Costs:</i>	<u>2011</u>	<u>2012</u>	<u>2013</u>	<u>2014</u>	<u>2015</u>	<u>Totals</u>

2011-2015**

<i>Project Name:</i>	Sewer Main Rehabilitation (E)	<i>Project Type Code:</i>	20
<i>Department:</i>	Public Works	<i>2011 Dept. Priority:</i>	4

*Description:* Sewer main relining, spot repairs and manhole repairs.

*Location:* Various

*Justification/Comments:* Maintain structural integrity of sewer pipes. Remove excess infiltration and inflow to minimize basement back-ups and sewer surcharges.

Note: Projects to be determined. Projects will be selected based on need.

*Annual Dollar Impact Upon the Operating Budget:* None

<i>Project Costs:</i>	<u>2011</u>	<u>2012</u>	<u>2013</u>	<u>2014</u>	<u>2015</u>	<u>Totals</u>

<i>Project Name:</i>	Water Main Replacement (E)	<i>Project Type Code:</i>	10
<i>Department:</i>	Public Works	<i>2011 Dept. Priority:</i>	6

*Description:* Water main replacement

*Location:* Various

*Justification/Comments:* Replace deteriorated water mains prone to leakage to minimize service disruptions and preserve water quality:  
 PENDING IMPROVEMENTS:  
 Evergreen Ave and Maple Street  
 800 thru 900 block of S. Owen Street (1,000 l.f. 8")  
 599 thru 800 block of S. Albert St. (1,000 l.f. 8")  
 600 thru 800 block of S. George St. (1000 l.f. 8")  
 Busse Road interconnect (1,150 l.f. 10")  
 Rand Road (2,000 l.f. 8")

Work may change depending on hydraulic water modeling.

*Annual Dollar Impact Upon the Operating Budget:* None

<i>Project Name:</i>	Traffic Improvements (N)	<i>Project Type Code:</i>	00
<i>Department:</i>	Public Works	<i>2011 Dept. Priority:</i>	7

*Description:* Implementation of Traffic Improvement Programs including Speed Limit Program, Intersection Control Program and Traffic Calming Program.

*Location:* Throughout the Village.

*Justification/Comments:* These programs will standardize our neighborhood traffic regulation applications with the intention of reducing speeding and neighborhood cut-through traffic.

*Annual Dollar Impact Upon the Operating Budget:* Approximately \$5,000 to maintain signage, striping and traffic calming measures.

<i>Project Costs:</i>	<u>2011</u>	<u>2012</u>	<u>2013</u>	<u>2014</u>	<u>2015</u>	<u>Totals</u>

(E) = Established Project

**VILLAGE OF MOUNT PROSPECT  
CAPITAL IMPROVEMENTS PLAN  
2011-2015**

**Project Name:** Tree Planting Program (E) **Project Type Code:** 00  
**Department:** Public Works **2011 Dept. Priority:** 10

**Description:** Planting trees in public rights-of-way and Village-owned properties.  
The Village currently owns approximately 24,595 parkway trees.

**Location:** Various - There are roughly 2,436 vacant planting sites available.

**Justification/Comments:** Goal is to plant approximately 610 trees each year. 450-660 trees removed each year.  
The estimated average cost of a 2 1/2" tree is \$209.00. Estimated 4% per year price increase.

<u>Programs</u>	<u>2011</u>	<u>2012</u>	<u>2013</u>	<u>2014</u>	<u>2015</u>
Reforestation	32,240	33,530	34,871	36,266	37,716
Tree Repl (V)	36,926	39,293	41,755	44,315	46,977
Tree Repl (S)	47,928	48,955	50,023	51,134	52,289
Public	7,883	8,198	8,526	8,868	9,222

Note: Reforestation = 1 1/2" free trees; Tree Repl (V) = Tree Replace Village includes cost share (village portion), hazard, misc., and ComEd replacements. Tree Repl (S) = Tree Repl Shared and are paid with donated funds and include cost share (resident portion), accidents, new construction, and ComEd trees. Public = Trees on public property for beautification. (Estimated planting totals: 160 C/S, 50 utility, 30 hazards, 100 new const., 20 beautification, 10 accident, 40 misc. and 200 reforestation).

**Annual Dollar  
Impact Upon the  
Operating Budget:**

None - The addition of new trees is expected to be approximately offset by the removal of old or decaying trees.

<b>Project Name:</b>	Ash Replacement Plantings (N)	<b>Project Type Code:</b>	00
<b>Department:</b>	Public Works	<b>2011 Dept. Priority:</b>	13

**Description:** Planting of replacement trees necessitated by the systematic 10 year removal of all but about 800 Ash trees from the public right-of-way -- in preparation for Emerald Ash Borer.

**Location:** Various - As of March 2010 there were 3,975 ash trees on public property.

**Justification/Comments:** Goal is to replace 318 ash trees each year with acceptable species, for the next ten years. The estimated average cost of a 2.5" tree is \$209.00 in March 2010. Estimated 4% per year price increase.

Note that these calculations take into account the Village Board's direction on 3/10/2009 to try to prevent infestation of about 800 existing White, Blue and Manchurian Ash. Therefore, they will not need removal/replacement.

**Annual Dollar Impact Upon the Operating Budget:** Not known at this time.

<b>Project Costs:</b>	<u>2011</u>	<u>2012</u>	<u>2013</u>	<u>2014</u>	<u>2015</u>	<u>Totals</u>
Ash Replacement Plantings	69,120	71,885	74,761	77,751	80,861	374,378
	<u>69,120</u>	<u>71,885</u>	<u>74,761</u>	<u>77,751</u>	<u>80,861</u>	<u>374,378</u>

2011-2015**

*Project Name:* Ash Tree and Stump Removals (N) *Project Type Code:* 00  
*Department:* Public Works *2011 Dept. Priority:* 14

*Description:* Systematic tree removal and stump grinding of all but about 800 Ash trees from public right-of-way over a ten year period in preparation for Emerald Ash Borer.

*Location:* Various - As of March 2010 there were 3,975 ash trees on public property.

*Justification/Comments:* Goal is to remove and stump grind 318 ash trees each year for the next 10 years. Cost to remove and grind 3,175 Ash trees using 2010 contract prices would be \$1,103,685. Average price of inflation per year is 4%. In 2010, 1/10th the cost of entire project would amount to \$110,369. Using a 4% inflation rate per year, see below for yearly projected costs.

Note that these calculations take into account the Village Board's direction on 3/10/2009 to try to prevent infestation of about 800 existing White, Blue and Manchurian Ash. Therefore, they will not need removal/replacement.

*Annual Dollar Impact Upon the Operating Budget:* None

<i>Project Name:</i>	Kensington Road Improvements (N)	<i>Project Type Code:</i>	50
<i>Department:</i>	Public Works	<i>2011 Dept. Priority:</i>	17

*Description:* Reconstruct roadway to 3 lane cross section with storm sewers, street lights, sidewalks and add right turn lanes from eastbound Kensington Road to Elmhurst Road.

*Location:* Kensington Road between Elmhurst Road and Forest Avenue

*Justification/Comments:* To obtain necessary improvements to roadway and to improve the intersection capacity and reduce cut-through traffic into the neighborhood.

The Village will front the cost for Engineering, but IDOT and Federal funds will be used to reimburse the Engineering costs and pay for all construction costs in exchange for a jurisdictional transfer of the improvements.

Note: Phase II Engineering cost \$70,000. Village & IDOT agreed to split. Construction is scheduled to start in 2011. Estimated cost \$3,332,500.  
 Fed share: \$2,332,750  
 State share: \$999,750

*Annual Dollar Impact Upon the Operating Budget:* Approximately \$7,000 per year for street light energy costs.

<b>Project Name:</b>	Lift / Relief Station Rehab (N)	<b>Project Type Code:</b>	20
<b>Department:</b>	Public Works	<b>2011 Dept. Priority:</b>	19

**Description:** Rehab sanitary sewer lift and relief stations

**Location:** Various

**Justification/Comments:** An engineering study performed in 2007 concluded that the underground wet well type of lift stations have reached the end of their useful life. Some of these lift stations are over 30 years old. Staff is recommending replacing these stations with submersible pump style stations and performing electrical upgrades to meet current codes and safety rules. Stations include George Street North/South (\$300,000), Louis Street (\$190,000), William Street (\$200,000), Cottonwood (\$180,000), Fairview (\$160,000), Lincoln Street (\$200,000), Huntington (\$350,000), Lincoln/We-Go (\$90,000), Maple/Berkshire (\$90,000),

*Project Name:* Public & Fire Headquarters Roof Repair (N) *Project Type Code:* 70  
*Department:* Public Works *2011 Dept. Priority:* 21

*Description:* Replace original public safety facility roof. Originally installed in 1993.

*Location:* 112 E. Northwest Highway

*Justification/Comments:* The existing flat roof over original fire department facility will be almost 18 years old, but has experienced several failures. We have had the roof patched twice but it is recommended that a permanent repair be completed sooner rather than later.

The existing shingled roof has also experienced numerous leaks and needs to be replaced along with some sheeting, installation of a new vapor retarder, some additional sheet metal copings and ice dam protection. The new shingles installed would have an improved drainage and ice control system.

2011 replace patio flat roof. 2013 replace shingled roof (includes HVAC equipment wells).

*Annual Dollar Impact Upon the Operating Budget:* None

<i>Project Costs:</i>	<u>2011</u>	<u>2012</u>	<u>2013</u>	<u>2014</u>	<u>2015</u>	<u>Totals</u>

<b>Project Name:</b>	Commuter Pay Station Replacement (N)	<b>Project Type Code:</b>	70
<b>Department:</b>	Public Works	<b>2011 Dept. Priority:</b>	22

**Description:** Replace the existing commuter pay stations with updated equipment.

**Location:** Commuter Parking Lots

**Justification/Comments:** The existing pay stations have already become obsolete with new systems which not only replace the existing units, but provide additional methods of paying with credit cards or by phone. These new options would eliminate many of the problems we are currently experiencing with the existing pay stations. Includes 7 existing units and 1 new unit in the West Lot.

**Annual Dollar Impact Upon the Operating Budget:** None

<b>Project Costs:</b>	2011	2012	2013	2014	2015	Totals
Commuter Pay Station	160,000	0	0	0	0	160,000

<i>Project Name:</i>	Residential AMR/AMI (N)	<i>Project Type Code:</i>	10
<i>Department:</i>	Public Works	<i>2011 Dept. Priority:</i>	24

*Description:* Expand the commerical/multifamily AMR/AMI system to include all residential properties

*Location:* Various

*Justification/Comments:*

The expansion of the AMR/AMI system to include all properties would provide greater fiscal control and accountability of our water revenues. The system would allow residents to no longer read their water meters and would provide multiple readings per day that would allow for timelier final reads and less inconvenience to the customers.

Approx. 12,000 residential units would need conversion @ \$300 ea. (2010 prices)

*Annual Dollar Impact Upon the Operating Budget:* The existing software maintenace fee of \$20,000 will cover this expansion.

<i>Project Costs:</i>	<u>2011</u>	<u>2012</u>	<u>2013</u>	<u>2014</u>	<u>2015</u>	<u>Totals</u>

2011-2015**

<b>Project Name:</b>	HVAC Replacement Program (N)	<b>Project Type Code:</b>	70
<b>Department:</b>	Public Works	<b>2011 Dept. Priority:</b>	25

**Description:** Replacement of +/- 20 year old roof top HVAC units.

**Location:** Public Works, Police & Fire Headquarters and Village Hall

**Justification/Comments:** Carrier estimates the life expectancy of a roof top unit to be +/- 20 years dependent on usage, overheating, weather exposure and ventilation. We currently have 7 roof top units at Public Works which were put in in 1988, 7 roof units at Police & Fire headquarters put in 1993, 5 roof top units put in at Village Hall in 2006 and 8 outside ground units at the new Fire Station 14.

We are recommending replacing two units annually.

**Annual Dollar  
Impact Upon the  
Operating Budget:**

<b>Project Costs:</b>	2011	2012	2013	2014	2015	Totals

<i>Project Name:</i>	Salt Storage Building (N)	<i>Project Type Code:</i>	70
<i>Department:</i>	Public Works	<i>2011 Dept. Priority:</i>	N/A

*Description:* Construct 6,000-8,000 ton road salt storage facility.

*Location:* Northwest corner of Melas Park.

*Justification/Comments:* Create ability to store an entire winter season worth of road salt (app. 6,000-8,000 tons) locally. Capability would lessen risk of not being able to obtain salt deliveries during severe winters when salt becomes regionally scarce. In addition, pre-purchased, advanced delivery of road salt in large bulk quantities should dramatically decrease transportation costs.

*Annual Dollar Impact Upon the Operating Budget:* \$1,000 maintenance per year

<i>Project Name:</i>	Storm Sewer Inspection Program (N)	<i>Project Type Code:</i>	40
<i>Department:</i>	Public Works	<i>2011 Dept. Priority:</i>	N/A

*Description:* Clean, televise and inspection of all Village owned storm sewers.

*Location:* Various

*Justification/Comments:*

With the new NPDES (National Pollutant Discharge Elimination System) regulations we are required to inventory and inspect all storm sewers on a regular basis. We have already inventoried our existing storm sewer system to identify any potential problems and prevent future failures. This satisfies one of the Best Management Practices required under the NPDES standards for MS4 systems to minimize and prevent any unnecessary infiltration of pollutants.

There are approximately 123 miles of storm sewers. Proposed 10-year inspection cycle.

*Annual Dollar Impact Upon the Operating Budget:* None

## **Village Multi-Year Technology Vision**

Technology is changing rapidly, providing the Village with new opportunities to boost efficiency and to improve services to residents, businesses, and staff members. At the same time, the expectation for improved services is growing, bringing new challenges to Village staff. The Technology Vision was created to facilitate the planning necessary to respond to these challenges responsibly. This is a dynamic document that will be reevaluated periodically and updated as needed.

The Technology Vision is intended as a general policy outline defining the current state of technology use and its future use. While a five-year plan is standard for most capital-related plans, a static five-year plan could be a limiting factor. Therefore, technology advancements will be monitored and leveraged as necessary to foster technology goals which may be implemented within the defined timeframe, a shorter timeframe, or a longer timeframe. Budget and staff limitations will further influence completion timeframes.

Technology has changed significantly since the first Village Technology Vision was created in 1997, but the goals set then are still valid today. Village staff continues to rely on these goals for direction.

### Technology Goals:

1. Increase timeliness/efficiency of service delivery, internally and externally
2. Minimize or eliminate paper/manual processing
3. Eliminate duplicate work
4. Share information across different departments/agencies (if applicable)
5. Improve information accumulation/management without incurring additional staff time
6. Expand opportunities to provide information to the general public with minimum additional staff effort
7. Protect the integrity of Village data/infrastructure
8. Improve/maintain system redundancy

## **BACKGROUND**

The Technical Focus Group, which is made up of representatives from the management staff of all the Village departments, was created in 2003 to facilitate collaborative planning of Village technology initiatives. Each department provided a five-year technology plan which Information Technology consolidated into this single Village-wide multi-year Vision.

The Computer CIP (Capital Improvements Plan) was created in 2004. The form was adapted from the Village's standard CIP form, with special fields for descriptions and justifications of computer-related requests. Departments fill out Computer CIP forms for any planned hardware or software purchase costing \$500 or more. The Computer CIP is used during the budget process and directly correlates with each departmental five-year technology plan.

## **CURRENT NETWORK ENVIRONMENT**

The Village's computer network encompasses six buildings – Village Hall, Public Works, Public Safety, Fire Station 12, Fire Station 14, and the Community Connections Center. The three main buildings are connected with fiber. Fire Stations 12 and 14 connect to the Village network with two T1 lines each. The Internet is accessed through an Opt-E-Man circuit (AT&T fiber) shared with the Library. The connection to the Community Connections Center is tunneled through the Internet to an Opt-E-Man circuit on the remote end.

Additionally there is a T1 line to Cook County from Village Hall, and there is a T1 line at Public Safety to Northwest Central Dispatch System (NWCDS). The Fire Department receives alerts from the Emergency Management Network (EMNet) via Satellite.

Seven wireless hot spots are currently installed at Public Safety for Police and Fire vehicles to access. Two wireless hot spots are installed at Fire Station 12. There are also wireless hotspots in the Village Hall Board Room and the Community Connections Center. See Appendix 1 for a network diagram.

Most of the network switches were upgraded as part of the VoIP (Voice over Internet Protocol) phone system project in 2008, providing gigabit connectivity to the workstations. Some older switches remain, but are primarily used for printers and other network devices that would not necessarily benefit from the higher speed.

The network includes approximately 350 PCs and laptops, and approximately 30 servers. In general the Village has standardized using Dell hardware and Microsoft Windows operating systems for workstations and servers. Microsoft Office is the standard office suite and Microsoft SQL is the standard database platform. There are a number of home-grown Microsoft FoxPro applications. See Appendix 2 for a list of primary departmental applications.

## **VILLAGE-WIDE SYSTEM INITIATIVES**

This section discusses current or upcoming projects that involve multiple departments. The "limitations" refer directly to issues listed by the departments in their five-year plans. The "resolutions" show the solutions planned at this time.

### **Wireless Connectivity and Remote Access**

The most common limitation noted by the departments is the need for wireless connectivity. Wireless technology encompasses multiple levels using different technologies. Point-to-point wireless can connect buildings. Wireless hotspots can allow field personnel to upload data gathered in the field. Mesh networks provide continuous connectivity between hotspots. Cellular wireless technologies use commercial cellular services for data. Remote access through a VPN (virtual private network) provides the ability for staff members to access network resources from a remote PC via the Internet.

Wireless connectivity directly relates to the second goal, minimizing or eliminating manual processing, and the third goal, eliminating duplicate work.

#### Point-to-point Wireless

Limitation: The outlying fire stations each have 3 Mbps of bandwidth to the Village network for phones and data combined, which is slow and inefficient.

Resolution: Implementation of point-to-point wireless connectivity to both outlying fire stations is planned for 2010. The installation will be coordinated with the water tower being painted this year. One of the T1 lines to each fire station will remain as a backup connection.

#### Wireless Hotspots

Limitations:

1. Community Development inspectors need to upload service request data gathered in the field.
2. Fire Department in-vehicle laptops need network access for frequent software updates.
3. Police Department in-vehicle laptops need to connect to the Police RMS (records management system) server to write reports and transmit tickets, and connect to NWCDS (Northwest Central Dispatch System) to obtain IJIS (Integrated Justice Information System) data.
4. Police need to upload traffic stop mobile video to their mobile video system.

Resolution: Information Technology staff is currently in the process of installing new wireless hotspots. Currently there are hotspots installed at Public Safety and at Fire Station 12. Additional hotspots will be installed at Fire Station 14, Public Works and the EOC. The access points use 802.11n technology (which provides fast throughput) and WPA2 (Wi-Fi Protected Access) encryption (which is the highest level of encryption available). Additional hot spot locations will be evaluated at a later date.

Information Technology is also working with the Police Department to utilize the Cook County Project Shield wireless access points to allow squad cars to access the Police RMS server and the NWCDS network. (This project is on hold until Cook County is ready.)

#### Access from Anywhere

Limitations:

1. Environmental Health and Building inspectors need to remotely query property history, permits, ownership, violations, and administrative adjudication actions.

2. Environmental Health and Building inspectors need to print inspection and notice violations from their vehicles.
3. Environmental Health and Building inspectors also need the ability to email photos from the field, possibly using Nextel phones.
4. Fire personnel need to remotely access property information, preplans and material data sheets from their vehicles.
5. Police squad cars need to access network applications, including email, the RMS server, and the IJIS (Integrated Justice Information System) database at NWCDS. Future collaborative initiatives include sharing mug shots and fingerprints among member agencies through the IJIS database.
6. As a future project, Police will research the feasibility of an in-car two-finger Live Scan in-field identification of suspects and offenders.
7. Another future undertaking is for select police personnel to make inquiries into LEADS and other data sources from departmental Nextel phones or Blackberries when in-car devices are not available.
8. Public Works field personnel need to access network applications including Hansen and their file server.
9. Community Development and Public Works need the ability to track vehicle locations.
10. Police officers need to access email via Outlook Web Access from in-vehicle laptops.

Resolution: To achieve this objective the Village would need to construct an extension of the wireless infrastructure to create a mesh network. There are no plans to do so at this time. Some of the departments have purchased cellular data cards for some of their laptops, but none of those laptops are currently accessing the Village network. Testing has shown that accessing the Village network through a VPN (virtual private network) does not work with some cellular data cards.

#### Remote Access

Limitation: Not everyone has remote access that needs it.

Resolution: VPN access is limited by the number of licenses. A remote access policy has been created to allow access to those who can justify the need and can implement the connection on their home PC with limited involvement from IT.

### New ERP (Enterprise Resource Planning) System

Enterprise Resource Planning is an enterprise-wide information system designed to coordinate all the resources, information, and activities needed to complete business processes. ERP software promotes integration and process automation, providing useful data and tools for staff.

Most of the Village data is address-based, so there is a huge benefit to sharing data across departments. The Village currently has a number of disparate databases linked together in an effort to share data, reduce duplication, and minimize discrepancies from different data sources. Some of the databases are standalone, some are linked directly and some are updated through nightly automated processes. See Appendix 3 for a diagram showing the applications that are linked.

The new ERP system directly relates to the second, third, fourth and sixth goals (minimizing manual processing, eliminating duplicate work, sharing information across departments, and expanding opportunities to provide information to the general public).

#### Limitations:

1. Community Development has a number of databases that do not communicate with each other. Building Clerks, for example, may need to consult up to six different data sources to issue a building permit.
2. Existing building permit and inspection software does not directly integrate with financial applications.
3. Finance's GEMS software has reached the end of its useful life and it has a number of technical and functional deficiencies.
4. There are a number of production processes, such as running payroll, that currently require the assistance of IT staff. These processes should be the exclusive domain of Finance.
5. The Village has a number of home-grown applications written in FoxPro, a programming language that will no longer be supported by Microsoft after 2010 (2014 if extended support is purchased) and need to be converted to newer technology for long term use. These programs are critical to Village operations.
6. Current business/operational processes need to be evaluated before implementing new software solutions.
7. Redundancy is required for disaster recovery and business continuity.
8. A self-service kiosk is needed to allow residents to conduct business from the Village web site.

Resolution: New ERP software is included in the 2009-2010 budgets. Staff has selected New World Systems as the software vendor. The new ERP system will replace the GEMS

financial, accounts payable, accounts receivable, payroll, and utility billing modules. It will integrate a suite of other business applications to streamline business processes.

The new ERP system needs to:

1. Integrate with building permit and inspection tracking data
2. Include a mobile data computer application to interface with field laptops for Environmental Health and Building inspectors
3. Expand upon e-bill presentation and payment program for residents to include payment of police tickets, building permits, etc.
4. Integrate electronic billing processes for programs such as business licenses, liquor licenses, alarms, etc. with general ledger
5. Improve efficiency
6. Implement budget document preparation functionality
7. Integrate time clocks, improve time reporting, and implement electronic personnel action forms
8. Implement capital project management functionality
9. Implement Village-wide automatic water meter reading
10. Accept electronic invoices from vendors
11. Accept permit payment through ACH (Automated Clearing House electronic payment)
12. Implement redundancy where possible
13. Reduce the dependency on custom applications and interfaces

The system evaluation and implementation will include:

1. Evaluation of business processes and performance (e.g. building permits)
2. Evaluation of security levels (what information should be viewed or accessed across departments or by the public)

#### Document Imaging

The Village's Laserfiche document imaging system provides the ability to scan paper documents and archive them for quick and easy retrieval. Document imaging relates to the first goal, increasing timeliness of service, and the fifth goal, improving information accumulation.

Limitations:

1. The use of document imaging needs to be expanded to reduce the time it takes to lookup information and retrieve documents.
2. Users need additional training to use Laserfiche more efficiently.

Resolution:

1. Community Development staff will scan Planning & Zoning cases, closed building permits, CDBG (Community Development Block Grant) case files, as-built and other design drawings, accounts payable invoices, check requests, and purchase orders.
2. Community Development will accept as-built and other design professional drawings in electronic format to decrease the number of documents that require scanning.
3. Information Technology will provide user training sessions.

Web Site/Intranet

Limitations:

1. Webcasts are needed to educate the public on the permit process and other Village initiatives.
2. Residents need the ability to purchase residential roof and sewer repair permits online. Residents must have the ability to schedule inspections and inquire on plan review status.
3. Residents should be able to submit service requests online.
4. Contractors should be able to purchase contractor licenses online.
5. A list of licensed contractors posted online would be useful for residents who need that information.
6. Compliance for property violations would improve if the violations and tenant-landlord inspection data were posted online.
7. SOPs (standard operating procedures) and other departmental information should be posted on the intranet for easy retrieval.
8. Interactive map-based links are needed to make it easier for residents to find zoning information.

Resolution: The web site resides on site and is managed by Village staff. Village staff is in the process of revamping the Village web site and intranet. Features of the new site will make it easier for staff to manage content and to collect/process data.

Staff has been discussing the possibility of publishing limited GIS (geographic information systems) functionality on the web to provide zoning and other information in a map-based format for public use. This project has been deferred but not eliminated.

Revamping the web server will address the first goal, improving timeliness of service, and the sixth goal, providing information to the public.

### Other Multi-Department Initiatives

#### Video Surveillance Cameras

Video cameras were installed in the Village Hall parking deck, on the exterior of the building, and in the main lobby this year. The Police Department plans to upgrade the video surveillance for Public Safety in 2011. Research for the initial Village Hall project has included Police staff members to ensure interoperability. Also the Police Department purchased two wide-screen video monitors in 2010 to accommodate the surveillance cameras.

## **DEPARTMENT-SPECIFIC INITIATIVES**

Department-specific initiatives may not have any impact on other departments, but can provide useful information for trends and potential collaborative efforts in the future. These initiatives are generally addressed through the budget process.

### Community Development

Staff is hopeful that most of Community Development's current issues will be resolved with the new ERP system. Their ERP needs include the ability to enter and retrieve data from the field, and print inspection and violation notices "on the spot". To make this possible they will need Tablet PCs and small portable printers.

### Fire Department

Video conferencing is needed to allow Fire personnel to remain at their respective response stations during mandatory training sessions. Training personnel simultaneously is also important for consistency. Currently, outside stations are required to leave their response districts to attend training at the downtown station.

25" wall-mounted touch screen computers will show daily bulletins, weather information, unit status, and dispatch information. Two computers will be installed at each of the outlying fire stations, four in Station 13 operations areas, one in Fire Admin and one in Fire Prevention.

### Finance Department

Most of Finance's current issues will be resolved with the new ERP system. Additionally the commuter parking meter system will be updated to accept bank debit/credit cards and Village debit card parking program will be discontinued.

### Human Services Department

Human Services need some enhancements to their departmental database. The enhancements would allow them to insert pictures and lookup clients by any of their phone numbers. In addition there are some reports that need to be added to the program due to the Community Connections Center.

### Information Technology

A server virtualization project began in 2009 and continues through 2011 to consolidate servers, minimize server maintenance windows, and to create new disaster recovery functionality. To facilitate growing needs for project collaboration, a future Microsoft SharePoint server is planned.

There are a number of older network switches that are no longer supported by Cisco. Replacements are budgeted for 2011 through 2013. Workstation operating system upgrades to Windows 7 are planned for 2011.

Projects relate to goals of sharing information, protecting the integrity of Village data and creating redundancy.

### Police Department

31 video surveillance cameras and two digital video recording units are scheduled for replacement in 2011.

The traffic stop (TSR) data collection system used pursuant to state law and department policy is scheduled for replacement in 2012. Other 2012 projects include replacing or enhancing the mobile video recording (MVR) system and working with the fire department and NWCDS towards a new radio system.

Future projects include:

- Partnering with schools and businesses to securely access CCTV (closed-circuit television) video feeds by first responder squad cars and at the Police Desk. Currently this is available at Prospect High School and Bosch, Inc.
- Researching additional methods to keep critical Public Safety operations running in the case of a power outage.

### Public Works Department

Public Works has been purchasing ruggedized laptops for key field-oriented personnel to improve decision making by reducing double-entry and speeding up data retrieval. One purchase is planned each year from 2011 through 2013. These purchases directly relate to the second and third goals (minimizing paper processing and duplicate work).

## **TIMELINE**

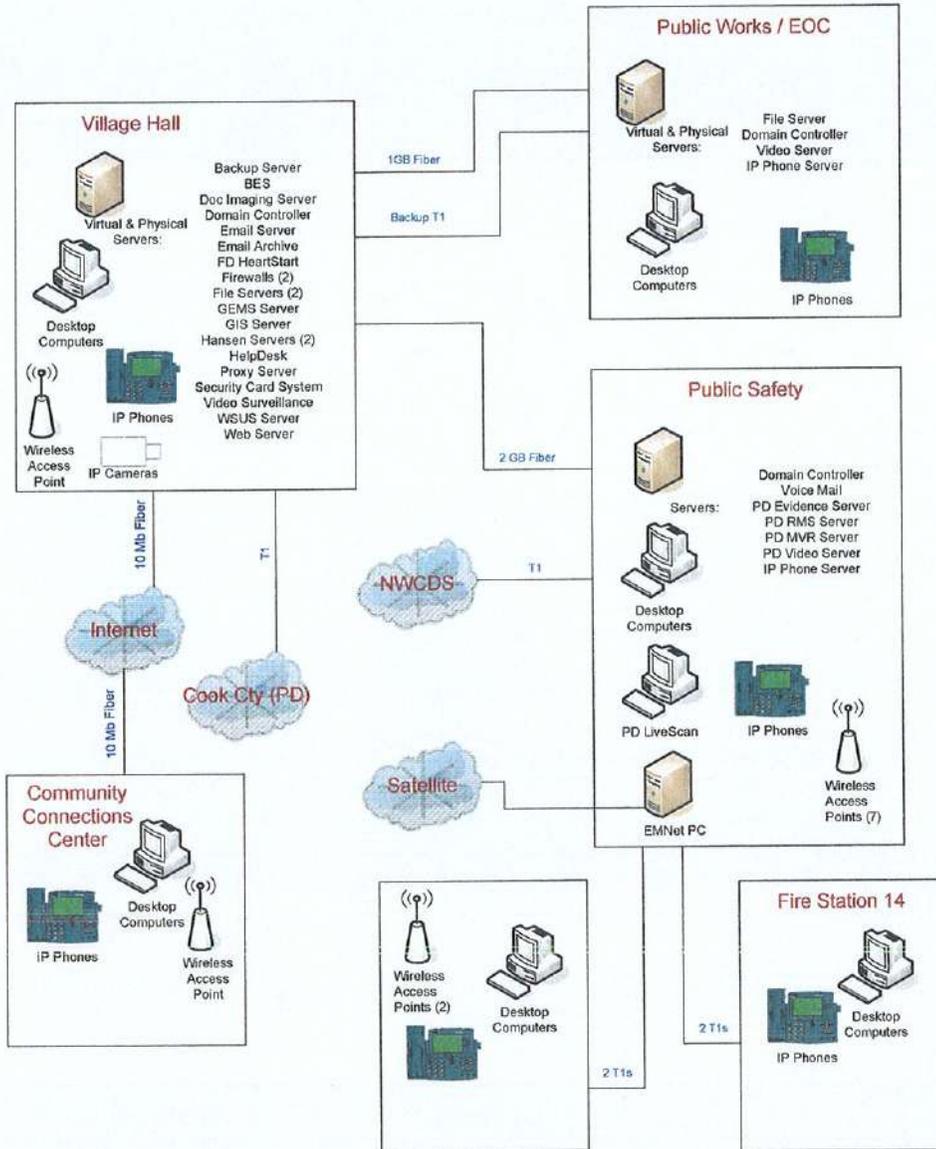

See Appendix 4 for the anticipated timeline for the budgeted projects and purchases. The project list and timeline is dependent on available technology, available budget and staff, legal requirements, and participation in multi-agency initiatives, and will be adjusted as needed.

## **CONCLUSION**

This Technology Vision is a collaborative effort of the Technical Focus Group. The Technology Goals were used as criteria to determine which projects should be included in the multi-year plan. The resulting Vision will be used as a blueprint for the direction of technology initiatives by all Village departments.

J:\Finance\CIP\2011-2015\Information Technology\Computer Vision 2010.doc

# Appendix 1 Network Infrastructure

## **Appendix 2**

### **Primary Departmental Applications**

#### Community Development

- Black Bear for building permits
- Code Enforcement for inspections and service requests other than licensed rental properties
- Multi-family for inspections and service requests at licensed rental properties
- Planning & Zoning for details of P&Z cases

#### Community Development / Police

- Crime Free Housing for crime-free housing certifications and nuisance type violations for rental housing units

#### Finance

- Cash register for point of sale
- Escrow Management for bonds requiring permits
- GEMS for general ledger, accounts payable, accounts receivable, payroll, and water billing
- Municipal Licenses for license details and transaction history for various business licenses
- Real Estate Transfer for details regarding the transfer of property within the Village from one owner to another

#### Fire

- Firehouse for managing data pertaining to fire and ambulance calls and fire inspections

#### Fire / Police

- Command Point CAD Client for computer-aided dispatch and field reporting

#### Human Services

- Human Services database for Human Services' clients and programs

#### Police

- ID Networks Records Management System for managing police records, ticket writing and reporting
- Live Scan for fingerprinting, digital mug photographs, and identification

#### Public Works

- ESRI GIS for visualizing, managing, creating and analyzing geographic data
- Hansen for service requests and asset management

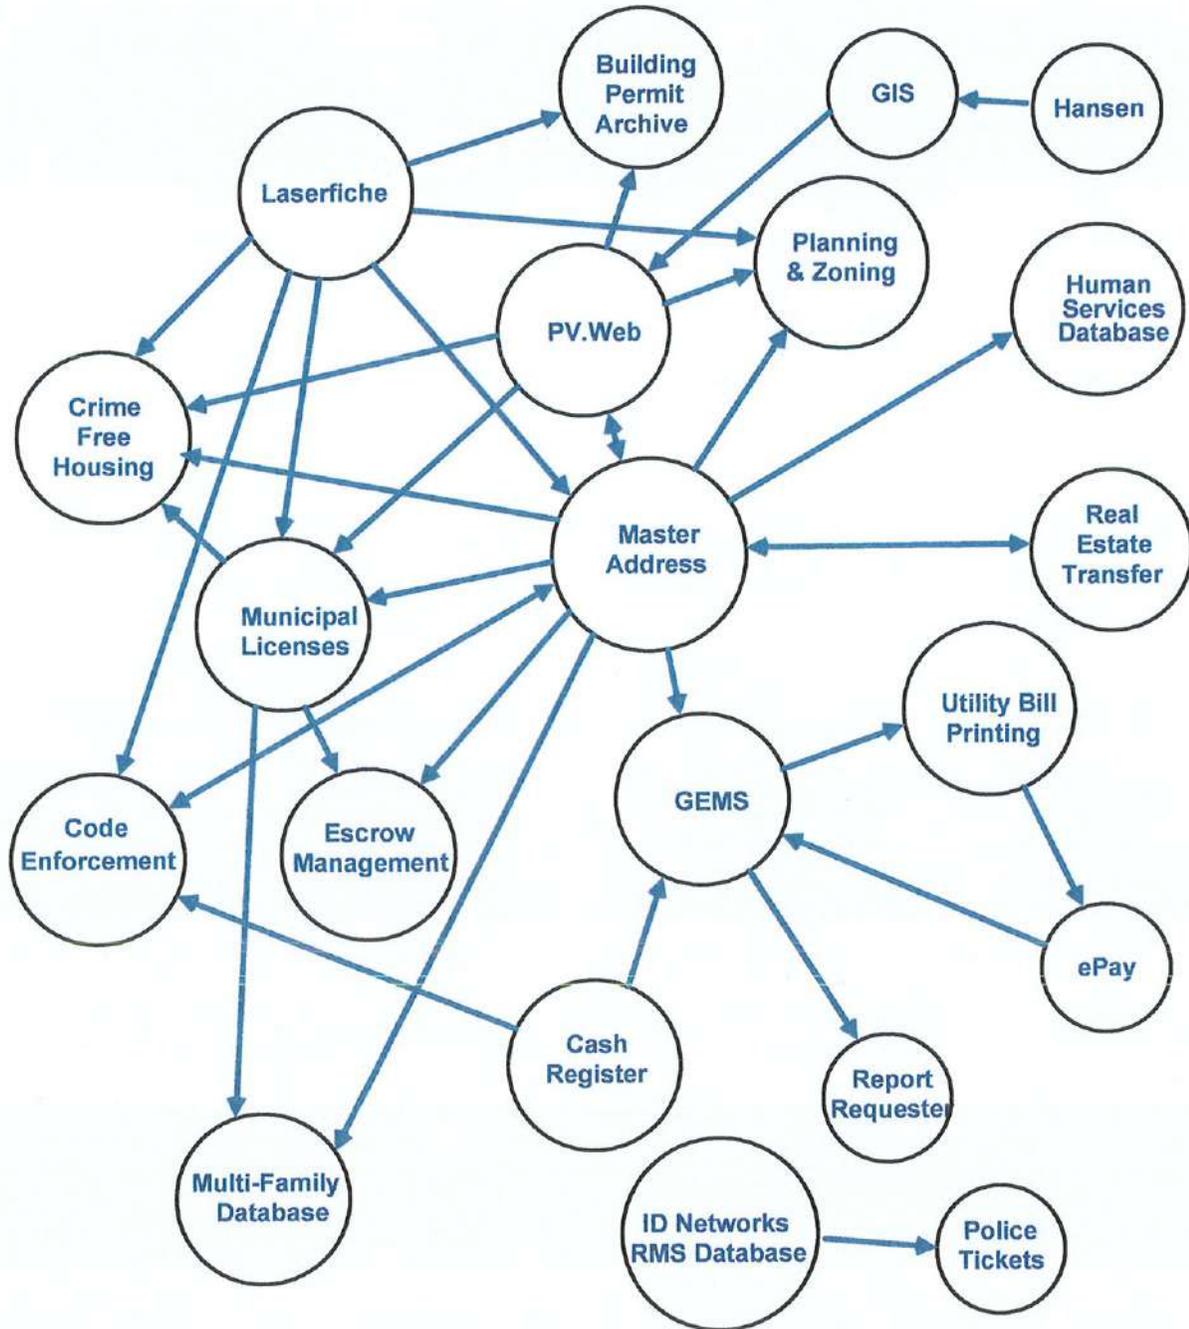

#### Village Manager's Office

- Windows IIS Web Server

#### Multiple Departments

- Cisco IP telephones
- Laserfiche for document scanning and archival
- Master Address for basic parcel and owner information for properties

### Appendix 3 Linked Database Applications

**Appendix 4  
Timeline**

Item Number	Description	Departments Leading Project	Status / Comments	Target Completion Date
1	Server Virtualization	IT	In progress	Q2 2011

VILLAGE OF MOUNT PROSPECT

COMPUTER CIP (Hardware / Software over \$500)

2011-2015

*Project Name:* UPS Units (E) *Project Type Code:* 80

*Department:* Village Manager's Office - IT Division

*Justification/Comments:* UPS units and batteries need to be kept up. Original purchases were staggered. Unit and battery replacements will be staggered as well. \$3,500 per year will replace two or three UPS units or batteries, depending on the capacity of the UPS.

*Is this part of the dept.'s 5-yr technology plan as provided to Technical Focus Group? If so, how?* Yes

*Implementation schedule:* As needed

*Personnel utilizing:* IT Staff

**VILLAGE OF MOUNT PROSPECT**  
**COMPUTER CIP (Hardware / Software over \$500)**  
**2011-2015**

*Project Name:* Server Virtualization (E) *Project Type Code:* 80

*Department:* Village Manager's Office - IT Division

*Description:* Server virtualization technologies provide the ability to consolidate servers, minimize server maintenance windows, and create new disaster recovery functionality.

<b>VILLAGE OF MOUNT PROSPECT</b>			
<b>COMPUTER CIP (Hardware / Software over \$500)</b>			
<b>2011-2015</b>			
<b>Project Name:</b>	Video Surveillance Camera System (N)	<b>Project Type Code:</b>	80
<b>Department:</b>	Police		
<b>Justification/Comments:</b>	Although the current system has adequately met department needs, it does not allow for the addition of cameras to be added to the system. Additionally, camera technology has greatly increased since installation and would provide enhanced imagery during day, night and mixed use situations. Additionally, software technology has advanced to allow integration of the department's electronic access system to monitor entry to secured locations with recorded video.		
<b>Is this part of the dept.'s 5-yr technology plan as provided to Technical Focus Group? If so, how?</b>	Yes, implement new or upgraded video surveillance system for the public safety building.		
<b>Implementation schedule:</b>	Third quarter		
<b>Personnel utilizing:</b>	Police Personnel

**VILLAGE OF MOUNT PROSPECT**

**COMPUTER CIP (Hardware / Software over \$500)**

**2011-2015**

*Project Name:* Video Conferencing (N) *Project Type Code:* 90

*Department:* Fire

*Justification/Comments:* The proposed video conferencing equipment transmits and receives audio and video to facilitate interactive communication between multiple sites. The equipment will be installed at all three fire stations and is intended to keep emergency personnel in their response districts more often. Training personnel simultaneously is required because of logistics and for consistency. Currently, outside stations are required to leave their response districts to attend training at the downtown station. The proposed equipment will allow simultaneous training while personnel remain in their respective stations.

*Is this part of the dept.'s 5-yr technology plan as provided to Technical Focus Group? If so, how?* Yes

*Implementation schedule:* Second quarter.

*Personnel utilizing:* Fire personnel.

**VILLAGE OF MOUNT PROSPECT**  
**COMPUTER CIP (Hardware / Software over \$500)**  
**2011-2015**

*Project Name:* Traffic Stop Data Collection System (N)      *Project Type Code:* 80  
*Department:* Police

*Justification/Comments:* The Department continues to collect traffic stop data pursuant to department policy and in compliance with State of Illinois mandates. The data collection system was first implemented in early 2004. The costs reflected in this proposal are the estimated upgrade and replacement costs after the system has been in operation five (5) plus years.

*Is this part of the dept.'s 5-yr technology plan as provided to Technical Focus Group? If so, how?*      Yes.  
The data collection system will need to stay compliant with State of Illinois mandates. An update on the estimated cost of the system will be done after the State provides standards for the data collection system.

*Implementation schedule:* Third quarter.

*Personnel utilizing:* All Sworn Patrol Personnel

**VILLAGE OF MOUNT PROSPECT**  
**COMPUTER CIP (Hardware / Software over \$500)**  
**2011-2015**

*Project Name:* Mobile Video Recording System (N)      *Project Type Code:* 80

*Department:* Police

*Description:* Install replacement mobile video recording systems in each patrol vehicle. Upgrade existing hardware and software to maintain recorded traffic stop video.

<b>2011-2015</b>			
<i>Project Name:</i>	Mobile Video Recording System (N)	<i>Project Type Code:</i>	80
<i>Department:</i>	Police		
<i>Justification/Comments:</i>	Pursuant to department policy, all traffic stops are recorded via a mobile video/audio system. This video/audio is then uploaded wirelessly to a dedicated data collection system. All video/audio is then archived for future use. The department installed the current set of digital wireless mobile video recorders in 2006.		
<i>Is this part of the dept.'s 5-yr technology plan as provided to Technical Focus Group? If so, how?</i>	Yes, the department will seek replacement and enhancement of its current MVR system.		
<i>Implementation schedule:</i>	2012		
<i>Personnel utilizing:</i>	Patrol Staff and all supervisors.
